

Systems Design Project - Feedback

UnderGrad Team 06 = 85% (split: 90, 85, 79%)

Split credit. JSturgeon @ 112.5%; ZJEng, JHNg @ 100%; RSinkler @ 87.5%

[40] UML Designs/Accuracy = 32

- Use Case Diagram UC3, UC7, UC8,
- Information Model IM2, IM5, IM12, IM15
- Normalised Data Model DM2 -- pretty good overall, only a consequential fault

[50] System Functionality/Usability = 46

Queries

- Register new patient
 - Subscribe to healthcare plan
 - Create new appointment
 - Block clashing appointments
 - Booking two days holiday
 - Recording treatment costs
 - Deducting prepaid costs
 - Processing payments
- covered all aspects well; was reported as robust by your testers and the only fault they could find was booking an appointment that ran past 5pm.

User Interfaces

- Secretary Interface -- nice, week-to-view
- Partner Interface -- nice, day-to-view

[10] Team Working = 7

- Project management strategy -- workload distribution, but pair-work on coding parts
- Effective, timely communication -- collaboration on the UML, which helped
- Workload balancing, deadlines -- on time.

Feedback Comment Bank

Please see the accompanying feedback sheet to decode the meaning of the letter-code comments that applied to your UML designs. Free-text comments from your database testers have been edited above.
